DNA Genetics Nucleus Internship

About

At Pillen Family Farms/DNA Genetics, we're always looking for great people to join our dynamic team - and that includes internship positions! We're a family-owned, family-focused business that takes great care in everything we do, from raising highly productive pigs to fostering team member development.

We specialize in all aspects of producing quality pork for the world's table which includes our genetic program (DNA Genetics), commercial production (Pillen Family Farms) all the way through final processing (Wholestone Foods).

Our internship program provides an in-depth, immersive experience into all areas of our business, from pig care to promoting our genetic program to customers. Each internship is well crafted to provide students of all majors and career goals with quality professional experiences.

Timeline

Summer Internship and Winter Break/Midterm Internship available (flexible upon academic schedule)

Duties & Responsibilities

Interns will obtain experience in the following areas:

DNA Gene Transfer Station
